

Control and security for your home
as easy as speaking on phone.

SIMON VOX.2

INTELLIGENT HOME MANAGEMENT SYSTEMS

THE TELECONTROL AND SECURITY SYSTEM WHICH ADAPTS TO YOUR NEEDS

Technical security

Personal security

Comfort

Remote Control/
Telemangement

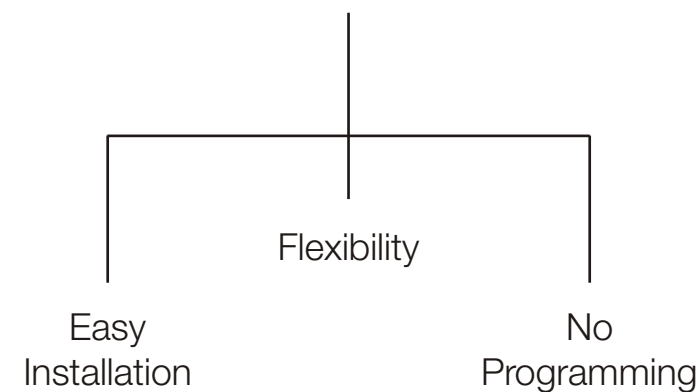

Phone saving

SIMON VOX.2 is a simple and efficient home telecontrol and security system which offers peace, comfort and savings at the same time.

With SIMON VOX.2 users can comfortably control their homes at all time via any internal or external telephone, receiving instant spoken or written responses via a touch screen or internet.

SIMON VOX.2 fits into your existing home as easily as in your new one

Installation ADVANTAGES

Easy installation

SIMON VOX.2 is installed easily and speedily. Since the power supply for the detectors and detection signal is of 230 V, one can easily use the installation circuits already available in the house.

Flexibility

Thanks to its simple installation, the SIMON VOX.2 system is applicable to any type of housing, commercial or business premises.

We can upgrade an existing system or apply a system in a renovated home through the radio frequency elements.

No programming

All you need to have the SIMON VOX.2 functioning is a telephone and the telecontrol centre.

You can connect the various alarms and control systems for the home through the phone by simply following the instructions received through the voice messages.

Convert your home into A SAFER HOME

TECHNICAL SECURITY

Enjoy maximum tranquility both inside and outside the house.

Receive alerts via telephone and the system touch screen in face of any water or gas leakage or smoke detection.

Automatic closure of electrovalves in case of water or gas leaks, avoiding explosion damages caused by water.

Flood detector with power source

Smoke detector with power source

Avoid surprises

SIMON VOX.2 will detect any water leakage, and act by cutting off the water supply and immediately informing you on your telephone and touch screen.

Sleep peacefully

In case of a gas leak during the night, SIMON VOX.2 will detect it, cut off the supply and inform you.

Immediate alert

SIMON VOX.2 will detect any concentration of smoke and inform you so that you can act speedily.

No mishaps

If there is a power cut in your absence SIMON VOX.2 will inform you to act immediately.

Live peacefully

SIMON VOX.2 will detect intrusion in the home, and inform you wherever you are.

Always nearby

The elderly or the sick will always have you at hand. The emergency button allows them to make an SOS call to you when they need.

Water leakage

Gas leak

Power cut

Intrusion

Panic button

With SIMON VOX.2 create the AMBIENCE YOU LIKE

COMFORT

Create your own ambience by regulating the temperature (heating and cooling) using the touch screen, with no need for a thermostat.

Control the system from your fixed or mobile phone, or from the touch screen or internet.

Manage any automatic unit: watering, external and internal lighting, domestic appliances, etc.

With the touch of a finger

All the units of the instrument can be controlled and connected from outside by any mobile or fixed phone, or from within the premises by the touch screen or internet.

Flexibility

SIMON VOX.2 adapts itself to any type of home, whether newly constructed, or whether under renovation. Thanks to the use of radio frequency units, you can upgrade or modify, according to your taste, without the need to carry out any works or changes.

Easy to use

Remote control

Power cut

Internal phone

As easy as speaking on phone

Two-way communication, SIMON VOX.2 will inform you of everything which goes on inside your house by making a call on your mobile or fixed phone. You can control and modify the system through clear voice messages via telephone.

Second home and business

In case of a power cut, SIMON VOX.2 will inform you so that you can take the appropriate measures. Ideal for long absences from home, second residences or business with cold storages. All the elements of the equipment can be controlled and connected from outside through any mobile or fixed phone, or from within the premises using the touch screen or internet.

Programme up to 4 phone numbers

In case you are away from home, SIMON VOX.2 will begin a cycle of calls to external phones, which have been defined by you (family members, office, etc.) to alert you of the incidence immediately.
