Vision

We believe India is ready for the latest global technology. The Indian consumer wants to explore the very best in aesthetics and usage. In a market flooded with options that may or may not be dependable, the buyers in this country need a name they can trust.

We believe smart technology can impact the quality of life. It can make life easier, safer and better looking.

We believe each customer has a specific need and taste. And solutions should be tailored to customer's need. Our understanding of the Indian market comes from years of experience. We put this understanding into every product we manufacture.

We believe we can bring all of this and more. Indian homes and offices now demand to be at par with the world. The time for change has come and gone.

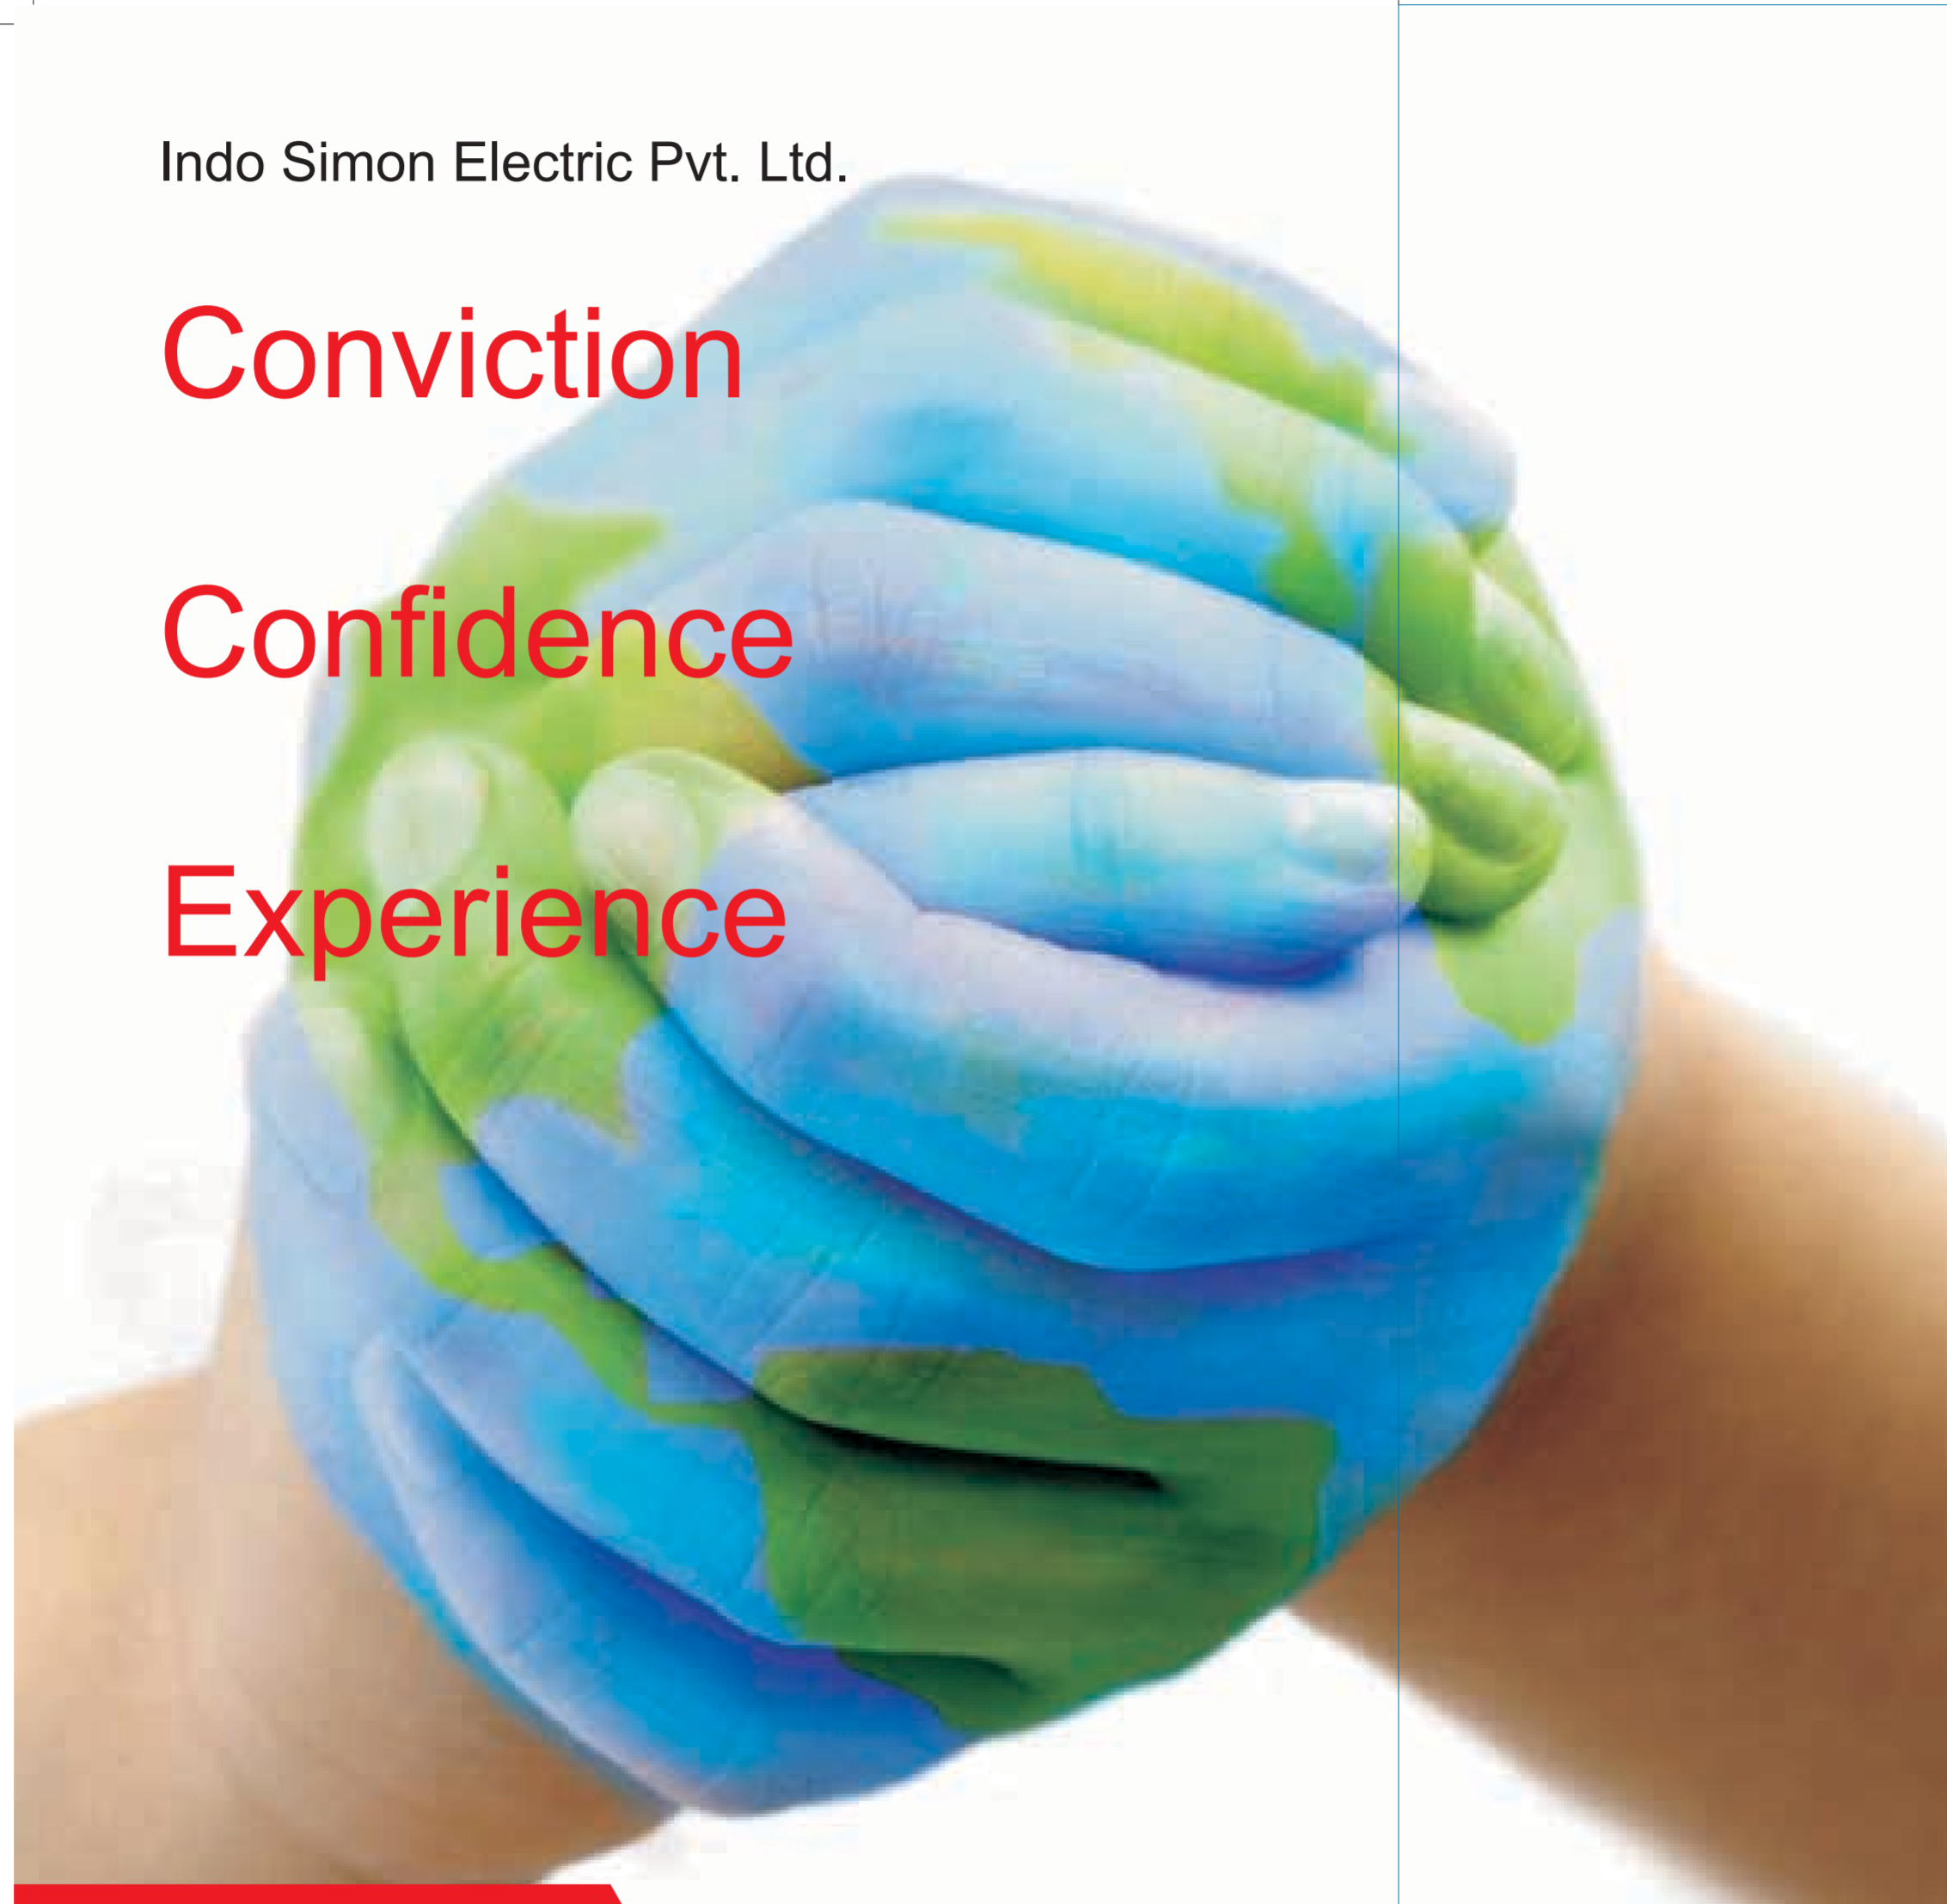

We believe its time to switch!
